

**Innovation
that excites**

Whether you're driving down to the ski slopes in Lesotho or using your bakkie to take your bike for a spin in the mountains, the new Nissan Navara Stealth has been engineered to assist you through the toughest of conditions. Here's some exciting features that will make your trip that much more thrilling:

Around View Monitor

You might be manoeuvring and parking in interesting places however, it's made easy with the four-camera Around View Monitor, which gives a bird's-eye-view of the vehicle while parking.

Intelligent 4x4

Choose fulltime 2WD for maximum efficiency, or shift to 4WD (4H) at speeds up to 100km/h. 4H constantly monitors conditions and adjusts the balance of power between front and rear to maintain traction. Select low range 4WD (4LO) for mud, sandy or difficult terrain.

Intelligent Hill Start Assist

When tackling steep hills, Intelligent Hill Start Assist will keep you from rolling backwards. This also comes in handy when you're in slippery off-road situations. It holds the brakes long enough for you to move your foot from brake to accelerator.

Design

The black sports bar, 18-inch black alloy wheels, and piano black finishes are complemented by bold orange accents to create a bakkie that stands out from the crowd. The interior boasts orange accent fabric and leather-combination seat with orange stitching giving added zest to the already stylish cabin.

Intelligent Key

No need to take the key out of your pocket with the Navara Intelligent Key-less entry and engine push start button.

Let's optimise your driving experience

On your trip you'll have a twin turbo engine with 140kW power and 450Nm torque, as well as a 6-speed manual transmission or 7-speed automatic transmission and a 5-link coil rear suspension, for enhanced driving performance.
